

1. Build a PHP code to store name of students in an array and display it using print_r function. Sort and Display the same using asort & arsort functions.

```
<html>

<body>

<?php

$name = array(' appu ', ' ammu ', ' minnu', ' pinki', ' thomas');

echo "display Array(using print_r): ";

echo "<br>";

print_r($name);

echo "<br>";

asort($name);

echo "<br>";

echo "sorted Array(using asort): ";

echo "<br>";

foreach($name as $x => $x_value) {

    echo "Key=" . $x . " , Value=" . $x_value;

    echo "<br>";

}

arsort($name);

echo "<br>";

echo "sorted Array(using arsort): ";

echo "<br>";

foreach($name as $x => $x_value) {

    echo "Key=" . $x . " , Value=" . $x_value;

    echo "<br>";

}

?>

</body>

</html>
```
